5. Problem Statement

1. How many ways are there to call a function in R?

Answer :

1. Calling a function with an argument
2. Calling a function without an argument.
3. Calling a function with argument values (by position and by name)
4. Calling a function with default arguments.

2. Is the below statement true?

• The lazy evaluation of a function means, the argument is evaluated only if it is evaluated

only if it is used inside the body of the function.

Yes this statement is true.

3. Mention true or false for below statements:

a. Insights driven from descriptive analytics is not meaningful. **FALSE**

b. The number of values in each Elements of a list, should be equal. **FALSE**

c. The datasets are not stored in memory of the computer using R. **FALSE.**

d. Data frames and matrices are two dimensional however the array is multidimensional. **TRUE.**
